MARELLA
HOMES

Your standard inclusions stay the same, no matter which scheme you choose.

The Beauty of a Considered Palette

Colour schemes are thoughtfully created combinations of finishes, materials, and colours designed by our interior team to work beautifully together. Each one reflects a different look and lifestyle, from warm neutrals to more modern tones.

By choosing from our pre-designed schemes, you're not losing freedom — you're gaining the confidence that every element will complement the next, without the overwhelm of hundreds of individual decisions. It also keeps your build timeframe and budget on track, since everything has already been tested, priced, and approved to deliver the quality Marella is known for.

It's a smarter, more streamlined way to get a professionally styled home you'll love living in — without the stress of starting from scratch.

8. Cladding Taubmans Gazebo White
9. Feature Stone Aussietecture, Irregular Orford Grey

Clean and composed,

the Edge Light scheme offers a **softer take on modern contrast**.

Light, crisp finishes form a clean foundation, while dark accents introduce *definition and depth*.

Balanced and refined, this palette creates a fresh, architectural façade that feels **polished yet welcoming** — ideal for those who appreciate clarity, contrast, and everyday liveability.

How Our External Schemes Work

The scheme provides the foundation, and the final application ensures the façade is resolved in a way that best suits the home.

Edge Light.*

*Presented on our
Lumi 21 Design*

Our external colour schemes are thoughtfully curated with a palette of colours and finishes to **guide the overall look and feel** of your home.

While each scheme establishes a clear direction, **the way these colours are applied can vary from façade to façade.**

This flexibility allows us to place finishes where they work best, so each design feels *balanced and intentional*.
